PROFILE

Full-Stack Developer (Analyst background) with professional experience building and deploying React and Python applications used by public-sector clients. Skilled in developing clean UI with a strong emphasis on testing, data accuracy, and performance. Passionate about improving customer journeys through scalable, end-to-end solutions.

SKILLS

Frontend: HTML, CSS, JavaScript, React
Backend: Python, NodeJS, Git, REST APIs
Data / Analysis: R, PowerBI, STATA
Tools & Platforms: GitHub, Azure, VS Code
Languages: Fluent in both Arabic and English (speaking and writing).
References: Available on request.

KEY PROJECTS

AFPS Added Pension Illustrator
Date: October 2025
Python, Flask, HTML/CSS, REST APIs

- Independently designed and developed a full-stack web dashboard to illustrate additional pension contributions and projected benefits for AFPS members.
- Implemented validation logic and testing to ensure accuracy of financial outputs.
- Deployed and hosted the application for internal and external client use, ensuring accuracy, reliability, and usability through testing and validation.

PORTFOLIO | https://hajars-portfolio.netlify.app/

SebberShots
Date: May 2026
GitHub: https://github.com/Hajar-Sebbar/SebbarShots-Project1.git
HTML, CSS, JavaScript

- Developed a responsive photography website showcasing photographer's portfolio using an interactive carousel by utilising animations features.
- Built a contact form with email integration for user enquiries.
- Designed a fully responsive layout ensuring compatibility across mobile, tablet, and desktop devices.

To-Do List
Date: April 2026
GitHub: https://github.com/Hajar-Sebbar/ToDoList-Project2.git
HTML, CSS, JavaScript

- Developed a dynamic task management application allowing users to add and remove tasks in real time.
- Implemented local storage to store tasks even after page refresh.

Simple Quiz
Date: April 2026
GitHub: https://github.com/Hajar-Sebbar/Quiz-Project3.git
HTML, CSS, JavaScript, API

- Extended a quiz application by integrating API to generate multiple-choice questions.
- Used asynchronous JavaScript to retrieve and process external data.
- Implemented logic to randomise answers and calculate total score at the end of the quiz.

WORK EXPERIENCE

Government Actuary Department, ***Analyst***
September 2022 – Present

- Built and maintained full-stack web applications using React, JavaScript, and Python, supporting clients including the NHS, Civil Service, and Ministry of Justice.
- Developed user-facing features enabling complex pension calculations and data visualisation.
- Contributed across the full development lifecycle, including front-end UI development, back-end data integration, testing, and deployment of internal tools.
- Performed quality assurance and testing on web applications and models, validating calculations, handling edge cases, and ensuring reliability across Python dashboards and Excel-based tools.
- Utilised R Studio to summarise complex data, analyse patterns, and improve processes, such as transitioning the AoE project from SAS to R Studio, allowing efficient data handling and analysis.
- Led and organised internal Coffee & Coding sessions to promote best practices in coding and collaborative development across the team.

Motability Operations, ***Risk Analyst (Placement year)***
July 2020 – July 2021

- Pricing Risk Analyst – Oversaw the NNWAV process and acted as a mediator between the different teams, updated manufacturer's monthly reports, risk board pack and PPC slides.
- Market Risk Analyst – Tracked and reported key economic variables, ran the raw MPI outlook to capture the residual values of 3yr cars, used key data to forecast the estimated revaluation.
- Economic Capital – Was responsible for the Operational & Cyber risk by redeveloping the model's sheet, writing the documentation, and creating the manual. Collaborated with the EC team and Deloitte during the MRM workshop to develop a model inventory.

City University London, ***Ambassador***
2018 – 2022

- **Brand Ambassador:** Engaged with prospective UK and international students via online platforms (Unibuddy), student Q&As, and university events to provide insight into university life and available support.
- **Widening Participation Ambassador:** Supported underrepresented students by promoting higher education opportunities and alternative pathways, helping to increase access and awareness.
- **Marketing Ambassador:** Represented the university at on and off campus events, assisting with planning and delivery, leading campus and accommodation tours, and ensuring smooth event execution.

EDUCATION

City University London, UK
Date: 2018 – 2022
BSc Economics (1st Class)
Modules include – Data Analysis, Econometrics, and Applied Micro and Macro

CERTIFICATION & TECHNICAL TRAINING

Meta Full Stack Developer: Front-End & Back-End from Scratch
Date: In progress
JavaScript, React, Python, Node.js, REST APIs

- Built a functional Django web application incorporating databases, views, routes and user authentication.
- Implemented programs using Python syntax, variables, data types, conditional statements, loops and functions.
- Developed interactive front-end application features using HTML, CSS, JavaScript, and React.
