PROFILE

Full-Stack Developer (Analyst background) with professional experience building and maintaining web-based dashboards using React, JavaScript, and Python. Contribute to various internal tools used by public-sector clients. Strong focus on clean UI, data-driven features, and quality assurance.

SKILLS

Frontend: HTML, CSS, JavaScript, React
Backend: Python
Data / Analysis: R, PowerBI, STATA
Tools & Platforms: GitHub, Azure
Languages: Fluent in both Arabic and English (speaking and writing).
References: Available on request.

KEY PROJECTS

AFPS Added Pension Illustrator
Dates: October 2025
Python, Flask, HTML/CSS, REST APIs

- Independently designed and developed a full-stack web dashboard to illustrate additional pension contributions and projected benefits for AFPS members.
- Deployed and hosted the application for internal and external client use, ensuring accuracy, reliability, and usability through testing and validation.

WORK EXPERIENCE

Government Actuary Department, ***Analyst***
September 2022 – Present

- Built and maintained dashboards and pension calculators using React, JavaScript, and Python, supporting clients including the NHS, Civil Service, and Ministry of Justice.
- Contributed across the full development lifecycle, including front-end UI development, back-end data integration, testing, and deployment of internal tools.
- Performed quality assurance and testing on web applications and models, validating calculations, handling edge cases, and ensuring reliability across Python dashboards and Excel-based tools.
- Utilised R Studio to summarise complex data, analyse patterns, and improve processes, such as transitioning the AoE project from SAS to R Studio, allowing efficient data handling and analysis.
- Led and organised internal Coffee & Coding sessions to promote best practices in coding and collaborative development across the team.

Motability Operations, ***Risk Analyst (Placement year)***
July 2020 – July 2021

- Pricing Risk Analyst – Oversaw the NNWAV process and acted as a mediator between the different teams, updated manufacturer's monthly reports, risk board pack and PPC slides.
- Market Risk Analyst – Tracked and reported key economic variables, ran the raw MPI outlook to capture the residual values of 3yr cars, used key data to forecast the estimated revaluation.
- Economic Capital – Was responsible of the Operational & Cyber risk by redeveloping the model's sheet, writing the documentation, and creating the manual. Collaborated with the EC team and Deloitte during the MRM workshop to develop a model inventory.

City University London, ***Ambassador***
2018 – 2022

- **Brand Ambassador:** Engaged with prospective UK and international students via online platforms (Unibuddy), student Q&As, and university events to provide insight into university life and available support.
- **Widening Participation Ambassador:** Supported underrepresented students by promoting higher education opportunities and alternative pathways, helping to increase access and awareness.

- **Marketing Ambassador:** Represented the university at on and off campus events, assisting with planning and delivery, leading campus and accommodation tours, and ensuring smooth event execution.

EDUCATION

City University London, UK
Dates: 2018 – 2022
BSc Economics (1st Class)
Modules include – Data Analysis, Econometrics, and Applied Micro and Macro

CERTIFICATION & TECHNICAL TRAINING

Meta Full Stack Developer: Front-End & Back-End from Scratch
Dates: In progress
JavaScript, React, Python, Node.js, REST APIs

- Built a functional Django web application incorporating databases, views, routes and user authentication.
- Implemented programs using Python syntax, variables, data types, conditional statements, loops and functions.
- Developed interactive front-end application features using HTML, CSS, Javascript, and React.
